

Colors

Synapson

I see you like a color
I feel you like a dance in the darkness
I want to be your lover

I see you like a color
I feel you like a dance in the darkness
I want to be your lover
I want you all around me like a sound that plays regardless through the silence
I want you
I want you
I want you
I want you

Don't need any energy but you
(So let the light in)
We can do whatever we want to
(Just let the light in)
All this electricity so right
(To let the light in)
Living in this world of black and white
But tonight

I see you like a color
I feel you like a dance in the darkness
I want to be your lover
I want you all around me like a sound that plays regardless through the silence
I want you
I want you
I want you
I want you

Too hot
'Cause we got it and you know it don't stop
You know the groove never took a minute off
We finna get it loose never tied up in a knot
Everybody in the spot got the gas fill it up
We keep it chillin' in the corner in the tuck
Got a pocket full of collards ain't no problem they can touch
It's just us

We'll let the light in

I see you like a color
I feel you like a dance in the darkness
I want to be your lover
I want you all around me like a sound that plays regardless through the silence
I want you
I want you
I want you
I want you
