It's shining so brightly that if I close my eyes
Your innocent smile is etched in my memory
I've watched it for so long, more than anyone else
The moment that I leapt up to my feet you waved your hand at me

See, even if my tears over flow
That rainbow will guild me

Surely Two as One!
I'll love you even if we're apart
I believe that the days we spent together
Are surely true as one!
Even if we chase different dreams
If we look up we're still under the same sky
I'll write it 360 degrees around your heart
An endless map to our future

The smallest promise can last through the night
Before you know it your STORY will shine

If the stars shoot away
Maybe my wish will come true

More of Two as One!

I can hear your voice
Don't forget that you're not alone
That's why To Be One!
Let's press on to a new tomorrow
I'm no long scared of change
I'll go 360 degrees around the world
And find a dazzling future

Hey, if you believe that the season will come when we meet again
Our wind can go anywhere

Surely Two as One!
I'll love you even if we're apart
I believe that the days we spent together
Are surely true as one!
Even if we chase different dreams
If we look up we're still under the same sky

More of Two as One!
I can hear your voice
Don't forget that you're not alone
I'll write it 360 degrees around your heart
Our limitless present and future
