

# Humans From Earth

**T-Bone Burnett**

We come from a blue planet light-years away  
Where everything multiplies at an amazing rate  
We're out here in the universe buying real estate  
Hope we haven't gotten here too late  
We're humans from earth  
We're humans from earth  
You have nothing at all to fear  
I think we're gonna like it here  
We're looking for a planet with atmosphere  
Where the air is fresh and the water clear  
With lots of sun like you have here  
Three or four hundred days a year  
We're humans from earth  
We're humans from earth  
You have nothing at all to fear  
I think we're gonna like it here  
Bought Manhattan for a string of beads  
Brought along some gadgets for you to see  
Here's a crazy little thing we call TV  
Do you have electricity?  
We're humans from earth  
We're humans from earth  
You have nothing at all to fear  
I think we're gonna like it here  
I know we may seem pretty strange to you  
But we got know-how and a golden rule  
We're here to see manifest destiny through  
Ain't nothing we can't get used to  
We're humans from earth  
We're humans from earth
