Where did you go my little baby Where did you go my little baby Where did you go my little baby From here, from here

Walking down the streets like a mad hatter Lunacy's back but does it really matter Watch out my man, my lady's coming Back to me

If your sting was like a bee Would you die only for me If you go across the sea Would you come back to me

Deception dissolves like a mind rainbow Sunset was dumped dark inside my bedroom Barracuda blue, won't you give My baby to me

If you go across the sea
Would you come back to me
If your sting was like a bee
Would you die only for me

Where did you go my little baby
