

Sometimes i really gotta wonder  
Is this just a spell we're under  
All we seeing is the rain and thunder  
Can we kick it in to an endless summer  
(come on) free flowin' communication  
Break the hypnosis grippin' the nation  
Do you know what i mean?

Maybe now it's up to us to put down  
The recipe we got to turn this 'round  
Time to turn the focus on to you and me

You got to believe in you and me  
Don't you know the truth will set you free  
You've got to believe in you and me  
Don't you turn your back on destiny  
Ahh yeah... truth gonna you free

There are times when it all seems hopeless  
I look at the dice how did i roll this  
Is there a way we can all find solace  
Can't we change the channel and adjust the focus  
(come on) a new world where the choice is endless  
I gotta message and i gotta send this  
Do you know what i mean?  
Maybe now it's us to put right  
Warm a chill we feelin' on a cold night  
Tap into the positive energy

[Chorus]

Some people say the world is ruthless  
But that's only cuz for now it's truthless  
Some people say that hope is useless  
Beware the tiger but the tiger's toothless  
We counter with imagination  
Now it's up to this generation  
Do you know what we mean?
