

CRY

Ta-ku

Lately, you've been going out more
Walking around with a lead heart, yeah
I know that I'm buying flowers
Petals keep falling around me

How do you want it?
Don't leave in sadness
You never ask me
Wrapped up in plastic
We living out here
I'll give you all mine
Keeps getting cold
When now, all my life is you

My life is you
My life is you
My life is you
My life is you
My life is you
My life is you
My life is you
My life is-

Lately, I've been going out more
Your silhouettes in all the lights
Wish you came with me those nights
Yeah, laid all my cards on the table
Gave me all these things that shine
When now, all I wanted was some time

I can't tell if we're wrong or right
Either way, you came and changed my life
And now I can't live without you
Can barely breathe without you
Need to confide in me
Speak on your mind with me
And maybe, then you'll see
All of the little things next to you

How do you want it?
Don't leave in sadness
You never ask me
Wrapped up in plastic
We living out here
I give you all mine
Keeps getting cold
When now, all my life is you
