

Notice

Ta-ku

I don't want to be an imposition
I just wanna be the one who listens to you
I know that you feel indecisive
I know that you're thinking about your life
Cause I go
Why'd you say that you loved her but failed to provide it?
This time you
I need you, I need you to

Deliver
Deliver your love
Deliver
Live up to your heart
I'd feel so much better
When you know it's me
I'd heal so much better
When you notice me

I've been living life with intuition
You keep saying that your mind's a prison, and you
Always bringing up things from the past, you
Say you never know but never ask me
I can fly
I'm falling but still need your help and protection
Don't lie, you
You need me like I need you too

Deliver
Deliver your love
Deliver
Live up to your heart
I'd feel so much better
When you know it's me
I'd heal so much better
When you notice me

And I feel it everyday (I feel it everyday)
But it still won't go away (won't go away)
And I feel this everyday (I miss you everyday)
But it still won't go away

Deliver
Deliver your love
Deliver
Live up to your heart
I'd feel so much better
When you know it's me
I'd heal so much better
When you notice me

And I feel it everyday
And I still won't go away
And I feel this everyday, yeah
But it still won't go away
And I miss you everyday
Yeah I miss you everyday
Yeah I miss you everyday

And I miss you everyday
