

WE GOT

Ta-ku

She's a mystery to me
Can't seem to describe it
She's something out of Heaven
Like the stars aligned it

When I first locked eyes
With you I saw our futures unfolding

Now you are the one that I am holding
I can be the one that you console in
Never knew a love so overflowing
No matter what the cost
Never gonna be apart
No one could ever take away the love that we've got

The road ahead is sacred
When I lose my way
She leads me by the hand
Before the colours fade
'Coz in the depths of the darkness
When I'm losing sight
With the breath of a word
She brings my whole world to light

When I first locked eyes
With you I saw our futures unfolding

Now you are the one that I am holding
I can be the one that you console in
Never knew a love so overflowing
No matter what the cost
Never wanna be apart
No one could ever take away the love that we got

She's a mystery to me
Can't seem to describe it
Something of the heavens
Like a star alignment

When I first locked eyes
With you I saw our futures unfolding

Now you are the one that I am holding
I can be the one that you console in
Never knew a love so overflowing
No matter what the cost
Never gonna be apart
No one could ever take away the love that we've got

Love that we've got
Love that we've got
Love that we've got
Love that we've got
Love that we've got
Love that we've got
Love that we've got
Love that we've got
Love that we've got
Love that we've got
Love that we've got
