

## Dark Sky

Tactical Sekt

Look up at the heavens above  
I know there's so much more  
Blinded by light  
The stars above were there before

My father took me by the hand  
And showed me the wonders of the sky  
Explored the depths of outer space  
Time travel with the naked eye

We destroy the earth  
Sell her out for gold and oil  
We erased the stars in heaven  
Allowed our once dark sky to spoil

A synthetic amber glow of ignorance  
Cancels out my beloved stars  
I once saw constellations infinite  
Now my space bares human scars

I can't see the light that hides in the dark  
I am blinded by light that destroys the night  
Turn the night in to day I can't see heaven this way  
I want my children to see what I saw  
What I saw  
What I now can't see
