Take on the World

Tad Morose

Come join the circuitry it's me Yes I've left the old ways, roaming free Let us reach out one more time Raise our banners, hold 'em high

This is your one chance to be free So shout it out! Yeah! Leave me be For all we know all hell might freeze It makes no difference don't you see Just set us free...

We shake the ground Break up the clouds Take on the world Let it roll In a different time We made the sign Shook the world Let it roll

Take your chances, spin the wheel Too much pressure, here's the deal For all we know all hell might freeze It makes no difference don't you see Just set us free...
