

replacement

TAEIA

Lit cig and my feet in the dirt
Bet you're wondering if I'm thinking bout her right now
Up late couldn't get me to sleep
Cause you're not what I need
If you're wanting to leave fucking go

I got everything that I want
Sometimes everything ain't enough I guess
And you know not to beg me to stay
It'll scare me away
Hope the look on my face says enough

Laying in my basement
We're still on the same shit
But you try to make it feel like it was never love
You're not who I want

You give and you give get nothing back
Your hands on my body feels like trash
Cause I know what I'd rather do
And you know that I'm using you

I love and I hate the thrill of this
You love me but I hate you'd kill for this
There's no better way to make this sound
You're just a replacement now

I'd drag it along til I die
So you gotta be the one to say goodbye
And it hurts but you gotta go first
It'll only get worse
And I made up my mind

Laying in my basement
We're still on the same shit
But you try to make it feel like it was never love
You're not who I want

You give and you give get nothing back
Your hands on my body feels like trash
Cause I know what I'd rather do
And you know that I'm using you

I love and I hate the thrill of this
You love me but I hate you'd kill for this
There's no better way to make this sound
You're just a replacement now
