Finally happy end

On a street thick with darkness

I'm lost and all alone

I try to get up again but

The scars I got

Cut from the broken pieces of my dreams, get deeper

Behind this sadness, will there be laughter?

Just like it's the darkest right before the sun rises

If I endure a bit more, I can reach that place

The person will hold out a hand for me

Who will lend a shoulder so I can rest

Someone to comfort me

If we're together, we can do it
We can endure and overcome
Together with you and me
If we're together, we can fill it up
We can embrace everything
Finally happy end

To stand alone in the darkness
I'm so lonely and afraid
Because I know, I can say it
Now I won't be like that anymore
Littlest things, a complicated maze
I won't think those useless thoughts anymore
Feeling a good day
I do not care all day yeah
We're together, so throw away all those thoughts, throw it
When you're tired, remember you're not alone

Like a toy thrown away in the corner
When I am nowhere
I look at your heart that pulled on my hand
Following the courage that shines the most

So we can live in this world together
People greet me
Together from the start

If we're together, we can do it
We can endure and overcome
Together with you and me
If we're together, we can fill it up
We can embrace everything
Finally happy end

Each moment becomes a precious light
I believe things'll get better slowly
Let's raise each other up and cheer on each other
Because in the end
We can laugh together

If we weren't together, we weren't us
You didn't let go of my hand and walked with me
I trust each other not to lie
Now we're stepping on the deep shadows and leaving

Our wildest dreams to be the best of nothing
We need to erase the thought that green is the best
On top of the road that we ran on in the dark
The times we spent together
I'm thankful for them, they're precious

Leaning on your shoulder during the dark times
You have too many colors
To leave it as a blank piece of paper
After the hard times are over
I'm knocking on your shoulders
Run out of the blackened, winter forest

My wildest dreams to be best of nothing
I feel your trust in our held hands
Next time, next time
Let's stay up all night

Dreaming small dreams, yeah

If we're together, we can do it
We can endure and overcome
Together with you and me
If we're together, we can fill it up
We can embrace everything
Finally happy end
