

## Alibi

Tait

I'm trying hard to understand you  
And your over-rated state of mind  
Sometimes you try to move me to you  
And make believe that it's all fine

You say you love me, yes you do  
But I know who I'm talking to  
You left me so lonely and empty  
And I don't need your alibis  
'Cause I can see through all your lies

You say you love me and I'll need you  
But I don't need to live my life that way, no way  
Every storm deserves an ending  
And a break to peaceful skies  
And every night I pray for my own mending

Parading around like you're a superstar  
Is that who you think you are  
The higher you go, yeah, the harder you fall  
You say you love me, yes you do  
But I know who I'm talking to

You left me so lonely and empty  
And I don't need your alibis  
'Cause I can see through your disguise  
You say you love me and I'll need you  
But I don't need to live my life that way, no way
