

Here I Stand

Taj Jackson

Where do we go from here
{Tell me} do you even want me still
{Tell me} you thinkin bout walking away
After everything we had say
But you heard enough and the rain is poring down
And you looking for someone to cover you
Baby that's what I wanna do

What you push me away, you don't know where
And I'm the one that loves you still, you know that I always will
I appoligise, just wanna be by your side, Baby I can't fight no more
Is that what we came all this way for

Here I stand {here I stand} from the accuse
And all that love for you baby you know I do so
Here I stand {here I stand} slowly confused
Welcome to the world where I'm fighting for my girl
So here I stand {here I stand}

Are you gonna hear me out {I'm talking}
All the words that I sing it counts, have you made your mind up bout
me
Did you even take time and think, think about the joy and pain
And how I felt about you will never change, girl I know who you reall
y are
How did we get this far apart

But you pushed me away, and you don't know where
I'm the one that loves you still, you know that I always will
I appoligised, just wanna be by your side, baby I can't fight no more
Is that why we came all this way for

Here I stand {here I stand} from the accuse
And all that love for you baby you know I do so
So here I stand {here I stand} slowly confused
Welcome to the world where I'm fighting for my girl so here I stand

How many chances are you gonna give [?]
You know it's you, I wanna be where you are too
But I can't do this no more, just not gonna think and close that door
This is all that I am and this is my final stand
I'm standing, I'm standing right here, I'm standing

Here I stand {here I stand} from the accuse
And all that love for you baby you know I do so
Here I stand {here I stand} slowly confused
Welcome to the world where I'm fighting for my girl
So here I stand {here I stand}
