

Perfect Sense

Take 5

uh huh, yeah, yeah, uh huh, ohhh yeah

You like to run and I like to chill
If I'm chillin with you girl
Every second that I have you I know I will (huh)
Spend it with you
You're into movies and resturants, and that's ok
But I spending nights with you is what I want
Because I like it that way
People say that it won't work
We're not compatable
As long as we're here on this earth
We will be inseparable

You, me, different as night and day
All we ever hear them say
What seems to be totally illogical
Makes perfect sense to me
We might be light years apart
Still we are tied at the heart
It's completely and totally illogical
But it makes perfect sense to me

You like to go on exotic cruises
To caribbean islands
Sip margarita's on a beach in
Mexico (oh oh oh) I like to go walking underneath the stars
Moon shining down on
You and me holding hands
We understand we got a plan
If that's wherever you are
It's where I wanna go (it's where I wanna go)
Don't you know
They can believe what they will
We'll prove them wrong
Come hell or high water alone
And still be strong

You, me, different as night and day
All we ever hear them say
What seems to be totally illogical
Makes perfect sense to me
We might be light years apart
Still we are tied at the heart It's completely and totally illogical
But it makes perfect sense to me

I always heard that opposites attract
You and I are living proof no matter what
Loves survives after all
Ooh yeah

You, me, different as night and day
All we ever hear them say
What seems to be totally illogical
Makes perfect sense to me
We might be light years apart
Still we are tied at the heart

It's completely and totally illogical
But it makes perfect sense to me

You, me, different as night and day
All we ever hear them say
What seems to be totally illogical
Makes perfect sense to me
We might be light years apart
Still we are tied at the heart
It's completely and totally illogical
But it makes perfect sense to me, yeah
