

Do you really want to be alive?
Take my hand and I'll show you how
Do you really want to be alive?
Come on, I'll take you to another place

We're on the edge
On the edge
We just might be lovers
Dive in to the glory where we'll be out there
We're on the edge
On the edge
Feel the taste of each other
Lie with me tonight without a single care

I've been loving since evermore (loving you since evermore)
But I've always thought of you just as a friend
What I feel today is something more (something more, something more)
With you here, there's no need for me to pretend

'Cause we're on the edge
On the edge
We just might be lovers
Dive in to the glory where we'll be out there
We're on the edge
On the edge
Feel the taste of each other
Lie with me tonight without a single care
We're on the edge

We're on the edge
On the edge
We just might be lovers
Dive in to the glory where we'll be out there
We're on the edge
On the edge
Feel the taste of each other
Lie with me tonight without a single care

We're on the edge
We just might be lovers
Lie with me tonight without a single care
We're on the edge
