

It Saved Me

Takida

Why
Did you break me
Tell me how
Could you do that, that life wasn't mine
When I screamed out loud
You were brought down
Then you fell hard with your soul to the ground
I walked away from the hole, it saved me
You sent me out in the cold but I saved me
I left my baiter alone, it saved me
Done with failure, I found my home at last
No more sad tears
I have it here, have it here
The flame that keeps everything in the clear
I walked away from the hole, it saved
You sent me out in the cold but I saved me
I left my baiter alone, it saved me
Done with failure, I found my home at last
Evil breathes into terror
The solid trust relents to fear
Wake up and fight the demons
Find the strength from anywhere
Yeah, yeah
I walked away from the hole, it saved me
You sent me out in the cold but I saved me
I left my baiter alone, it saved
Done with failure, I found my home at last
