

## Skid Row

Takida

See it in perspective, we must be protected  
Suicide collected, it could be effective  
We pray for kind mothers and proceed for broken fathers  
There's a love to the other, sisters and brothers

We got poison on the streets  
There is may I'm in disbelieves  
On the future plans I'm running low  
People begging on their knees  
Please find a cure for this disease  
But our world turns to a big skid row

I remain in dying eyes  
We'll be believe in it  
Tonight there is nowhere we can hide  
When the reaper comes alive  
Everybody let go, everybody find home  
Everybody follow, no more fucking sorrow

We got poison on the streets  
There is may I'm in disbelieves  
On the future plans I'm running low  
People begging on their knees  
Find a cure for this disease  
But our world turns to a big skid row

On time  
I just run now  
On time

When the heat leaves your body alone  
I will keep your heart in my soul  
I'll be joining you soon in the cold  
We are going home

We got poison on the streets  
There is may I'm in disbelieves  
On the future plans I'm running low  
People begging on their knees  
Find a cure for this disease  
But our world turns to a big skid row

On time  
I just run now  
On time
