

Variations On A Cloud

Tally Hall

Both of us see a cloud, or whatever we may believe
Being it may be proud or whatever we want to see
Okay, jump

Cirrus in light you lie
(Cumulus dark you vow)
Give us varying shades of gray
(Give us colorful shades of gray)
Floating inside the sky
(Floating outside the sky)
Show us everything every day
(Show us nothing in any way)

Okay, jump to end it all
Let this one be to break the fall

It's a little bit of magic to end the world
But I thought you knew me truly
Something different then we started with in the world
Does it even matter to me?

I was in the hearing
Bumming a humble clearing from Caligula
In his Shangri-la, la la

It's a little bit of magic to end the world
But I thought you knew me truly
Something different then we started with in the world
Does it even matter to me?

Miracle worker, I saw you begin it
Walking on water, so soft on the rain
See what you see on the surface, a limit
Ladies and gentlemen, please why don't we

Keep it coming back
And coming back
And coming back
Why don't we
Keep it coming back
And coming back

Join if you wish

Keep it coming back
And coming back
And coming back
Why don't we
Keep it coming back
And coming back

These days it's
Hard to find friends
(We've been to this scene)
Opportunities bend
(Aboriginal meme)
And we spend the chance sleeping on the top of a fence

(Had a smotherful mother full of metal and steam)
Can't believe what we've seen
Won't be burned to the ground
Though we make ourselves castles every time were around

Do you like how I walk? Do you like how I talk?
(It's a little bit of magic to end the world)
Do you like how my face has learned to tick like a clock?
(But I thought you knew me truly)
I have a wonderful life, I know a powerful bob
(Something different then we started with in the world)
He eulogizes me for being geocentric
(Does it even matter to me?)
(Ha ha ha!)

Why don't we keep it coming back
And coming back
And coming back
Why don't we
Keep it coming back
And coming back
And coming back
And coming
