

Landscapes

Talos

Oh devil
Hide amongst the reeds
And water...
The bodies under me
Well you held the rope
You let go and I fall
You have it all

Snapped together in your landscape
We are heat stains
Magnetized by the night light
As a feather
I would suffer for your landscape
In the moon haze all that's left
Are our bloodlines

Oh devil
Hide among the leaves
And water...
Bleaches over me
When you held me close
Did you die when I spoke
You had it all

Snapped together in your landscape
We are heat stains
Magnetized by the night light
As a feather
I would suffer for your landscape
In the moon haze all that's left
Are our bloodlines

Whelped up
This shin is our's
Never fraught in falling words
This here hope leads us astray
Lie now and never open
The eye is moving over us
Feel it start a Godless day
Snapped together in your landscape
We are heat stains
Magnetized by the night light
As a feather
I would suffer for your landscape
In the moon haze all that's left
Are our bloodlines
