

Reborn

Talos

O Sanctum cover me
No sound the river frozen
Our bed is in that ocean

Gather the church to me
Souls dripping down devotion
My mother speaks

On a wave washed away
All that water washed away
Fall to water washed away
All that water washed

On a wave washed away
All that water washed away
Fall to water washed away
All that water washed

O Sanctum cover me
We find the river swollen
Our birth is in that ocean

No heights will harbour me
Get too near you'll fall away
Get too near you'll fall away
Ooooh

On a wave washed away
All that water washed away
Fall to water washed away
All that water washed

On a wave washed away
All that water washed away
Fall to water washed away
All that water washed

You know what it feels like
When that grinning skull shows teeth
So take me over
Let the city fall from me
In between the islands we will
Swim like children speak
No one can hold us now
No one can hold us now

On a wave washed away
All that water washed away
Fall to water washed away
All that water washed

On a wave washed away
All that water washed away
Fall to water washed away
All that water washed
