

Day One

Tamia

We beat the odds together
Didn't care when they said we'd never last
We kept our eyes on our own past

Time flies and we watch the others
Fall apart, when they once were lovers, oh
Everyone said, we'll make it through

How far we've come
Darling, look at us

If I could do all again, I would
Give me the bad days, along with the good
My heart is even more in love with, than it was on day one
Funny how it all falls into place
We grow even closer with every mistake
It's crazy how we're still in love, the way we were on day one

Who said the road was easy
Our hearts put to the test, believe me yes
But we found our happiness

No one, knows what the future holds
But right here and right now
I just want you to know
We've got a bond unbreakable

We're so in love
Darling look at us

If I could do all again, I would
Give me the bad days, along with the good
My heart is even more in love with, than it was on day one
Funny how it all falls into place
We grow even closer with every mistake
It's crazy how we're still in love, the way we were on day one

We haven't been without our issues
But I'm so blessed to do this with you
What our journey that we've been through
Look at us

If I could do all again, I would
Give me the bad days, along with the good
My heart is even more in love with, than it was on day one
Funny how it all falls into place
We grow even closer with every mistake
It's crazy how we're still in love, the way we were on day one
