

## Things I Collected

Tamia

I don't need another long talk  
About what's wrong with you and me  
And I don't need another conversation  
About the way we're supposed to be  
Now I see that you're gone  
And I don't believe that everything  
I have to get over you

How could you make me love you and then just walk away  
Like you never did a thing to lead me on in any kind of way  
How could you make me feel so helpless every day  
From the path you laid before me  
These are things I collected along the way

I got tears in my ears sometimes and I got a bad case of sleep  
last night  
And I got holding you on my mind and I try to think of ways I c  
an get you back all the time  
Oh baby, that's a lot of weight to carry every day  
But these are things I collected along the way

Everytime I think about it I hate it in every way  
Said I thought I couldn't live without you  
But I live with it every day  
Never thought I'd see the day that you would ever leave  
But now I'm here sifting through memories

How could you make me love you and then just walk away  
Like you never did a thing to lead me on in any kind of way  
How could you make me feel so helpless every day  
From the path you laid before me  
These are things I collected along the way
