

Mix with me, unfold solutions  
Bare witness to my evolution  
Violent moans, untamed contusions  
We're not really here it's all Illusions

Tonight we relish in design  
You say that I'm a state of mind  
I say you're space, you say I'm time  
What if the two could intertwine  
You grab me there your fingers sink  
We breathe, we tense, no time to think  
I take you 'til you're on the brink  
Then we dive off the edge in sync

Make love, fuck  
Lick me up  
Petals, pluck  
Drive me, clutch

Breathe me deeper baby, inhale  
Intoxicate yourself then exhale  
Pay attention to my detail  
Like a wind that flows, that's how we feel

You give me you, I give you me  
We take our time because we're free  
You say that I'm a sight to see  
I say that you're a masterpiece  
There's no reason to refrain  
What's your pleasure, what's my name?  
Blend and merge until we're same  
Nothing much of us remains

Make love, fuck  
Lick me up  
Petals, pluck  
Drive me, clutch
