TANERÉLLE

It's just us now
You help me
See me, mm
When everything's loud
You hold me there, mm

You're the moon and I'm the sun
My perfect reflection
You're an echo, safe and sound
And I am the mountains
Leaving room for you inside
Leave some room for me, oh
Yeah, uh-huh

Whatever I give to you
You mirror back to me
Whatever I give to you
You mirror back to me
Whatever I give to you
You mirror back to me
You mirror it back to me
You mirror it back to me

It's just us now
You help me
See me, mm
When everything's loud
You hold me there, mm

You're the moon and I'm the sun
My perfect reflection
You're an echo, safe and sound
And I am the mountains
Leaving room for you inside
Leave some room for me, oh
Yeah, uh-huh

Whatever I give to you
You mirror back to me
Whatever I give to you
You mirror back to me
Whatever I give to you
You mirror back to me
You mirror it back to me
You mirror it back to me
