

# Ripe

TANERÉLLE

I know you've been wondering where to go when you're feeling lonely  
The answer's in the palm of the hand that's connected to me  
I'm where you go, lips softer than ripe  
Skin lit by the moonlight, roads dip at my side  
Index to mouth  
Please don't bite your tongue  
Tell me all your secrets  
I'll lock every one

You make me hotter than the hottest flame  
You make me blue, until blue is my name  
You stay on the brain  
You stay on the brain

So let's watch as we watch  
As the world spins around and around  
So let's go to the ends of the earth, as we cross all their bounds

I know you been thinking you can't  
But I think that you should  
If I can make your whole body ache  
I can make you feel good  
I'm what you need, I'm what you know  
Hooked on your axis  
You make my world go  
I'll keep you wild  
I'll keep you free  
Say you'll be mine  
I'll show you what that means

You make me hotter than the hottest flame  
You make me blue, until blue is my name  
You stay on the brain  
You stay on the brain

So let's watch as we watch  
As the world spins around and around  
So let's go to the ends of the earth, as we cross all their bounds

I think I've got me a notion  
I really feel that our love is ripe  
I think I could be your ocean  
But I know I could change your life

I think I've got me a notion  
I really feel that our love is ripe  
I think I could be your ocean  
But I know I could change your life
