TANERÉLLE

(We've been waiting out time)

I swear I've loved you before  
I just can't remember time and place  
It's close but I can't recall  
But somethin' in my gut tells me it's safe  
To open up to you in every way  
And love on you as nights turn into days  
And let myself get doused inside your flame

We've been waiting out time like it's only  
Just a matter of life moving slowly  
When you're in my eye  
Dance like you know  
We've been here before  
Safe when you hold me

Only got a next life for the holy  
But we've been getting discounts like it's so cheap  
When you're in my eye  
Dance like you know  
We've been here before  
Safe when you hold me

I knew you before I could recall it  
Ride in trying times because you solid  
Swear you never fold up like a wallet  
You an angel in my eyes, one of the fallen  
I remember pool side convos  
Kissing with our eyes closed  
Wishing we could relive every moment in the past  
With the speakers up loud and the bass on blast  
Got Frank Ocean in the back  
While we saving all our cash  
Tryna stack our dollars  
Become scholars  
Young man ever since I popped my collar  
Young love growing as the times got shorter  
But if you can trust anytime you need me you can call up  
Love's not lost, it's on sight  
So I'll find you in the next life  
In the comets  
Live for you I be breaking down when you gone and  
I'mma love you always girl that's a promise

We've been waiting out time like it's only (Oh-yeah)  
Just a matter of life moving slowly (Whoa)  
When you're in my eye dance like you know (Whoa)  
We've been here before  
Safe when you hold me

Only got a next life for the holy  
But we've been getting discounts like it's so cheap (So cheap)  
When you're in my eye  
Dance like you know  
We've been here before  
Safe when you hold me

In the next lifetime  
And the one after that  
You'll be all mine  
And I'll be yours back  
In the next lifetime  
And the one after that  
And the next, and the next, and the next, and the next  
And the next, and the next, and the next, and the next
