

Make a Little Time

Tank

You said it sister, can't you see
Everywhere you lay your head's the place to be
You said it sister I believe
Watching senoritas while we're slamming down
Tequilas and I...

Guess you know what I need
It's not at all by chance we meet
This is just why you cum
I need a little bit of loving and a whole lot of fun

And I'm living day by day
Take it easy that's what I say
Just have a good life and let it flow
And make a little time for some rock & roll

Now baby what you say has been going on here
What's this all about?
You're a sooped up sugar pop no word of a lie
You come and flash your smile and now it's time to
Say bye bye and I...

I guess you know what I need
It's not at all by chance we meet
This is just why you cum
I need a little bit of loving and a whole lot of fun

And I'm living day by day
Take it easy that's what I say
Just have a good life and let it flow
And make a little time for some rock & roll

I dance with crown royal and my friend Jacky D
That's just how we roll
We gonna party till we drop and that we don't have to try
You know that it's a promise baby and it is no lie and I...

I know you know what I need
It's not at all by chance we meet
This is just why you cum
I need a little bit of loving and a whole lot of fun

Cause I'm living day by day
Take it easy that's what I say
Just have a good life and let it flow
And make a little time for some rock & roll
