

World on Fire

Tank

Their bombs are crashing down
Over head
A burning ocean of fire
Our soldiers won't come back
From the dead
No life no hope no desire
Now we rise as one
And stand with both feet on the ground

This can't go on for all eternity
Their hatred soon will expire
No we stand as one
And force them to see what they've done

This life we are living will soon
Come to end
A time for forgiving is lost there
With the stand
Their evil come feed off your
Wide open hand
Can't you see, can't you see

We're watching our world catch on fire
Can't you see
Can't you see
We're watching our world catch on fire

This war is closing in over head
Now save your sons and your daughters
The aftermath of blood flowing red
Just like an ocean of fire
Now we fight as one
And send them all straight back to hell!

Their curse of destruction will soon
Come to end
A time to remind them we'll stand here
And defend
Don't let them come feed off
Your wide open hand
Can't you see, can't you see

We're watching our world catch on fire
Can't you see
Can't you see
We're watching our world catch on fire
Can't you see
Can't you see
Our world is on fire

This war is closing in over head
Now save your sons and your daughters
We must stand as one
And send them all straight back to hell!

Their curse of destruction will soon
Come to end

A time to remind them we'll stand here
And defend
Don't let them come feed off
Your wide open hand
Can't you see, can't you see

We're watching our world catch on fire
Can't you see
Can't you see
We're watching our world catch on fire
Can't you see
Can't you see
Our world is on fire
