

Cheddar Biscuits

Tanner Adell

I held on longer than I should have
I drove it straight into the ground
Well, now I'm sick of all your whining
Yeah, I'm sick of breaking down

I'm trading in, trading up
Moving on, moving up
It ain't ever cheap to let them go
(It ain't ever cheap to let them go)
A broken heart'll break the bank
But credit cards can buy some change
Maxing out the platinum and the gold, yeah

So I got a new truck, new puppy
Hot phö, credit eight hundred
Loubouts, Gucc' sunnies
Don't need sugar, I got my own honey

You said that roses were expensive (Expensive)
I bought a hundred for myself
Just to prove that I'm worth it (Worth it)
And I don't need nobody else

I'm trading in, trading up
Moving on, moving up
It ain't ever cheap to let them go
(It ain't ever cheap to let them go)
A broken heart'll break the bank
Credit cards can buy some change
Maxing out the platinum and the gold, yeah

So I gotta new truck, dune buggies
Souped up, credit eight hundred
Red bottoms, play bunnies
Don't need daddy, I got my own money

Dripping, leaving, puddles, gonna need some rubber boots
Spending like it's nothing, like I'm 'bout to cop a coupe
Dipped in butter, cheddar buiscuit, lobster in the booth (Yeah)
Gripping leather, whipping Rover, sipping Bullet Proof (Yeah)

Ladies, if your car has more than a hundred thousand miles
And your man makes less than a hundred thousand dollars
You know what you gotta do

Girl, trade him in, trade him up
Move him out and move on up
It ain't ever cheap to let them go
(It ain't ever cheap to let them go)
A broken heart'll break the bank
But credit cards can buy some change
Maxing out the platinum and the gold, yeah

So I got a new truck, new puppy
Hot phö, credit eight hundred
Red bottoms, play bunnies
Don't need sugar, I got my own honey

Dripping, leaving, puddles, gonna need some rubber boots
Spending like it's nothing, like I'm 'bout to cop a coupe
Dipped in butter, cheddar biscuit, lobster in the booth (In the booth)
Gripping leather, whipping Rover, sipping Bullet Proof (Yeah, baby)
