

Come Back Down

Tanner Usrey

Tell me, darlin', how's your mom been?
How's the weather where you are?
'Cause me, I've been better
Still chasin' dreams, still shootin' at the stars

And tell me, have you found a new man?
Tell me, have you moved on?
'Cause me, I'm gettin' tired
And this road, it's gettin' hard

And it's street signs and people
Prescription pills and too much booze
All the things I use, tryin' to forget about you
And I still see your face in every single crowd
But you're never there to catch me
When I come back down

And it's a fucked up situation I put us in
When the woman I left you for left me for another man
And I guess I should apologize
But I never could lay down my pride

'Cause it's street signs and people
Prescription pills and too much booze
All the things I use, tryin' to forget about you
And I still see your face in every single crowd
But you're never there to catch me
When I come back down

Oh

And it's street signs and people
Prescription pills and too much booze
All the things I use, tryin' to forget about you
And I still see your face in every single crowd
But you're never there to catch me
No, you're never there to catch me
No, you're never there to catch me
When I come back

Tell me, darlin', how's your mom been?
How's the weather where you are?
'Cause me, I've been better
Still chasin' dreams, still shootin' at the stars
