

Who I Am

Tanner Usrey

Never been one for hanging around
I love you baby but I break you down
Leave the pieces on the ground
It's just who I am I guess
Who I am I guess

The things I've done and the places I've seen
You think you do but you don't know me
You know who I wanna be
It's just who I am I guess

And I told you baby from the start
How this would end
A goodbye kiss in the middle of the road
Saying we should just be friends
I took all you had
And there's nothing left
That's just who I am I guess
Self-destruction at best

We really thought that no one will know
But the lies are starting to show
And it gets cold out on the road
It's just who I am I guess
Who I am I guess

It feels like I'm going insane
Every town, it looks the same
I'm sick of hearing my last name
It's just who I am I guess

And I told you baby from the start
How this would end
A goodbye kiss in the middle of the road
Saying we should just be friends
I took all you had
And there's nothing left
That's just who I am I guess
Self-destruction at best

And the man in the mirror
Ain't the man that they see
Do you like the way I make you feel
Or just the way I sing?

And I told you baby from the start
How this would end
A goodbye kiss in the middle of the road
Knowing damn well we ain't friends
I took all you had
And there's nothing left
That's just who I am I guess
That's just who I am I guess
Self-destruction at best
Self-destruction at best
