

Mighty Long

Tapes 'n Tapes

And you're living alone
And your head is hustling
You know I feel my soul
Now you are hid inside
And you're carrying all the times
That I go over alone
When your heart is a bitter
Today I've been leaning my heart
In a different way
My mind is a flutter
Your head is on fire
I've been here all day
And I'll be here all day
In the night you wait for the sun
And your head is cold as it's gone
The world comes more over to one
Oh you've done it alone
All your sorries aside
And you hold it all night
You hold it all
All I ever loved
Now you're working my heart
You're cold and gone
I bet you the way you say you'll never
Never go at it alone
When your heart is a bitter
Today I've been leaning my heart
In a different way
My mind is a flooder
Your head is on fire
I've been here all day
And I'll be here all night
'Cause it's mighty long
Mighty long
When the cold is inside
I caught your halo tonight
Where, oh where if the sign
Go at it at night
All the night
All the night
All the night
You do it alone
