

Into the Sun

Tarja Turunen

Dream against the flow
Let your garden grow
Over land and waters
Feel no borders

Walking right into the sun
Don't fear the ending
Find the beginning
Over another lonely star
Brighter than who you are
Walking right into the sun

All my sweetest thoughts
Let them help you out
My emotion
Parted ocean

Walking right into the sun
Don't fear the ending
Find the beginning
Over another lonely star
Brighter than who you are
Walking right into the sun

Walking right into the sun
Don't fear the ending
Find the beginning
Over another lonely star
Brighter than who you are
Walking right into the sun

Find another lonely star
Brighter than who you are

Walking right into the sun
Don't fear the ending
Find the beginning
Over another lonely star
Brighter than who you are
Walking right into the sun

Don't fear the ending
Find the beginning

Brighter than who you are
Walking right into the sun
