

# Free Fall

Tasmin Archer

You're every measured expression  
That fades lonely as the moon  
And brings a dawn of halos  
The mother of my invention  
A Venus light that fills the room  
Protection in a rain storm  
You bring another dimension

When we free fall me and you  
Yeah when we free fall me and you  
We will be side by side admiring the view  
When we free fall me and you  
Yeah when we free fall me and you  
We will be all the things we imagined we would  
We'll fly so high

You bring the spirit of dancing  
A cool rhythm on the breeze  
The summer warmth of flame tones  
Ring out the hour you're hemmed in  
Feel liberation breathe  
The door to open is the one that doesn't have to be  
On and on through years recurring  
Atomised by what you're learning

When we free fall me and you  
Yeah when we free fall me and you  
We will be side by side admiring the view  
When we free fall me and you  
Yeah when we free fall me and you  
We will be all the things we imagined we would  
We'll fly so high  
Be home and dry  
We'll fly so high  
Be home and dry

When we free fall me and you  
Yeah when we free fall me and you  
We will be side by side admiring the view  
When we free fall me and you  
Yeah when we free fall me and you  
We will be all the things we imagined we would  
We'll fly so high  
Be home and dry  
We'll fly so high  
Be home and dry  
We'll fly so high
