

Psycho

Taylor Acorn

Never been one of the crazy ones
Never been the girl to leave you like thirty missed calls
I'm not a villain but you made me one
So now I'm throwing knives at pictures of your face on the wall

It seems like boys like you all love to say
That chicks like me are just insane
But boys like you give men a shitty name
So let's play a game

Where I throw a little brick through your pretty little face
You're easy on the eyes but you're easier to hate
An angel's gonna fall if you come around
If my name's still on your tongue then I'll rip it out
Since I'm already the bad guy in your head
I'll hit you with my car and I'll leave you for dead
And I've always liked the view from the high road
But baby for you, I'll be a psycho
I'll be a psycho
I'll be a psycho
I'll be a psycho

Maybe you'll end up in a body bag
If I can't have you then nobody can
'Cause I watched all the documentaries, I know just where to hide it
I'll put you in a box six feet deep and wait till you wake up inside it

Boys like you all love to say
That chicks like me are just insane
But boys like you give men a shitty name
So let's play a game

Where I throw a little brick through your pretty little face
You're easy on the eyes but you're easier to hate
An angel's gonna fall if you come around
If my name's still on your tongue then I'll rip it out
Since I'm already the bad guy in your head
I'll hit you with my car and I'll leave you for dead
And I've always liked the view from the high road
But baby for you, I'll be a psycho
I'll be a psycho
I'll be a psycho
I'll be a psycho

I've never been one of the crazy ones
I'm not a villain but you make it so damn fun

So I'll throw a little brick through your pretty little face
You're easy on the eyes but you're easier to hate
An angel's gonna fall if you come around
If my name's still on your tongue then I'll rip it out
Since I'm already the bad guy in your head
I'll hit you with my car and I'll leave you for dead
And I've always liked the view from the high road
But baby for you, I'll be a psycho
I'll be a psycho
I'll be a psycho

I'll be a psycho
Baby for you, I'll be a psycho
