

Somebody Else

Taylor Acorn

Don't wanna think twice
I just want open skies with you
So tired of the neon lights
I just wanna chase the night with you

I wanna see the sunrise coming up on your side
Head your way out to the coast
Wanna know what it feels like, staring into your eyes
Cause baby, that's what I need the most

We got New York to LA, anywhere in the middle
You beside me
I just want you to myself
I can't help thinking about how good it could be
But you're with somebody else
But you're with somebody else

Could've been the perfect place
Could've been the perfect time to say it
Maybe I got there way too late
Maybe you gave up way too early

We could've seen the sunrise coming up on your side
Head your way out to the coast
Could've felt what it feels like, staring into your eyes
Cause baby, that's what I need the most

We got New York to LA, anywhere in the middle
You beside me
I just want you to myself
I can't help thinking about how good it could be
But you're with somebody else
But you're with somebody else

Wanna see the sun rise coming up on your side
Wanna know what it feels like, staring into your eyes
But you're with somebody else

We got New York to LA, anywhere in the middle
You beside me
I just want you to myself
I can't help thinking about how good it could be
But you're with somebody else
But you're with somebody else
You're with somebody else
