

# Soul Dancing

Taylor Dayne

I know that I love you  
With all the weight of the world  
Upon you shoulders  
Sit back and don't let the blues

Take over your love  
You got to share with the world  
All the bright things you are to me  
I need you baby

Look out the window  
And you'll find the sky is blue  
And your eyes are matching  
What I'm feeling for you

I know a place we can go  
Where we can get up and lose control  
Let's go baby  
We're soul dancing together

Hearts beating with pleasure  
Soul dancing forever  
Feels so sweet, like heaven  
I know that you've traveled far

You're weary and you're in doubt  
But I am here to hold you baby  
You've got to trust in this love  
It's bigger than any one of us

Believe me baby  
Kick off your worries and frowns  
There's no time to get down  
Just move on up

Sweet now baby  
I got a place that I know  
Our minds and bodies will float away  
Let's go baby

Kick off your worries and frowns  
There's no time to get down  
Just move on up  
Sweet baby

I got a place that I know  
Our minds and bodies will float away  
Let's go baby
