

I Need A Woman

Taylor Ray Holbrook

Well we were pretty as a picture in a frame
Like a Hollywood couple on their wedding day but I ran away
Perfect as a peach picked from a tree
Probably ripe for someone but wasn't right for me
And I don't wanna make a promise I can't keep

I need a woman willing to want me all her life
I need a woman wanting more than just one night
Someone who'll love me true and through the test of time
I need a woman to get these women off my mind

Like a wild fire that burned for days
We had a sparkle we couldn't keep aflame
Diamond propositions
Made from compromised positions
But I don't wanna make a promise I can't keep

I need a woman willing to want me all her life
I need a woman wanting more than just one night
Someone who'll love me true and through the test of time
I need a woman to get these women off my mind

I need a woman willing to want me all her life
I need a woman wanting more than just one night
Someone who'll love me true and through the test of time
I need a woman to get these women off my mind
(I need a woman, I need woman) To get these women off my mind
(I need a woman, I need woman) To get these women off my mind
(I need a woman, I need woman) To get these women off my mind
(I need a woman, I need woman) Get these women off my mind
