Firefly

Taylor Swift

Someone struck a match against the night,
All I could see was you and I.
I was captivated.
A perfect little dream inside my head,
And then reality crept in, and erased it.

For a while I thought that I could hold you,
But you were just a temporary high.

Firefly you drew me to you,
Your beauty shines and lights up the sky
And you don't know it, do you?
I wish I could keep you, firefly
Firefly

Something so beautiful and free,
Was as never meant to be caged in
I thought I had you in my hand,
I tried to catch you, but I can't
Chase the wind

And just as I reach out to touch you,
I remind myself you were meant to fly.

Firefly you drew me to you,
Your beauty shines and lights up the sky
And you don't know it, do you?
I wish I could keep you firefly
Firefly

I like to think I'd be all that you wanted
Not even that is enough

Firefly you drew me to you
Your beauty shines and lights up the sky
And you don't know it do you?
I wish I could keep you
I wish I could keep you, firefly
Firefly
