

## Late Nights

TCTS

You been on my mind, I can't get enough  
It's taking all my time  
Show me what you like 'cause I wanna know  
So we get this right

There's something real in how it feels  
After the sun goes down  
So keep me craving, here all day  
Till darkness comes around

Pull me closer now so when you let go  
It's too far to leave, yeah  
Know without a doubt when I want you more  
I don't need no sleep

There's something real in how it feels  
After the sun goes down  
So keep me craving, here all day  
Till darkness comes around

You know I want those late nights with you  
Wait till the stars are out and that's when you move  
You got me feeling something each time we move  
On those late nights, late nights

With you

You know I want those late nights with you  
Wait till the stars are out and that's when you move  
You got me feeling something each time we move  
On those late nights, late nights
