

Thinking About You

TCTS

Babe, I let you get the best of me
Lately you have made a mess of me
I suspect you already know, waiting for you, time goes slow
I suspect you already know about me

Feel you rushing through my veins, on my body
Now you're going to my head
There ain't nothing that explains it entirely
Got me hanging by a thread

Thinking about you, thinking about you
Thinking about you, thinking about you
Thinking about you, thinking about you
Thinking about you, thinking about you

Baby, this ain't something I can't sustain
Baby, you hit me like a hurricane

Feel you rushing through my veins, on my body
Now you're going to my head
There ain't nothing that explains it entirely
Got me hanging by a thread

Thinking about you, thinking about you
Thinking about you, thinking about you
Thinking about you, thinking about you
Thinking about you, thinking about you

Feel you rushing through my veins, on my body
Now you're going to my head
There ain't nothing that explains it entirely
Got me hanging by a thread

Thinking about you, thinking about you
Thinking about you, thinking about you
Thinking about you, thinking about you
Thinking about you, thinking about you
