

ENTERFEARENCE

Tech N9ne

Enter

It felt a lot like I was disoriented

Enter, enter

Enter, enter

Enter, enter

At first, I didn't know what was happening

Enter, enter

And then, I knew exactly what was happening

I was in a daze

It was impossible not to stand there amazed

Rubbin' my opticals with my hands, there's a glaze

'Cause the view is implausible when I scan terri- days

Try to fight the sun, so I try to run

But the heat is so thick, I got no hydration on my tongue

No libation to come

And death is ticking, my lungs

I am stunned when I hear a voice in my say, "The fun is done"

Here come the drums

Dumpin' ammunition

Come the ban the -ism because I am the vision

Sent the plan the mission of in-demand divisions

'Cause hand in hand we livin', but man, we damn near trippin'

Caught so many run away from the light, huh

They want they enlightened to pay the price, huh

But I'm comin' like a thief in the night, huh

Stomping the fire when you put the N9ne in your life, huh

Choppers can't stop us today

I got the drop if you spray

Other people that are praying say, "Tech, please stop"

Opps on the blocks and the cops in the way

But I'm no longer a resident, now I see it's evident

If I am over then am I'm not gonna be a revenant

Or was I really ever meant to be the medicine

But all of a sudden, I heard a voice up in my head

It went, "Heaven-sent"

Enter, enter

Looked up, the sky was fallin'

Then I looked around, everybody's crawlin'

Enter, enter

Thinking to myself, "This can't be real

This is how a giant, or a God must feel"

Enter, enter

Looked up, the sky was fallin'

Then I looked around, everybody's crawlin'

Enter, enter

Thinking to myself, "This can't be real

This is how a giant, or a God must feel"

Realized the sky ain't falling, but the cerebral lie that I am tallin'

Leavin' thy divide and brawlin'

And made the evil die and lie in y'all sin

Lightyears ahead of my peers

Quite weird with no right-near

Cry tears leaving my fears

Now the bright cheer for the white beard
I've been on a mental elevation, I been awakened
And making all the hatin' and fakin' keep dissipating
Try'na straighten the nation with the faith and the aberration
They're shaking the core of Satan, 'cause I'm safe as salvation
They try to hold me down, but it chose me now
To go enter fear and experience showed me how
Evolution from that abusiveness so be proud
Lot of truthin' what I'm shootin', just load me, pow
Then I enter
Into the river of death and blood where only evil's delivered
I will not stop
I know the force that's within me is bigger
Take all the tension, all the shooting and lynchin'
All the blood I am rinsin' off and commencin'
To reinvent, this is my ascension to another dimension

Enter, enter
Looked up, the sky was fallin'
Then I looked around, everybody's crawlin'
Enter, enter
Thinking to myself, "This can't be real
This is how a giant, or a God must feel"
Enter, enter
Looked up, the sky was fallin'
Then I looked around, everybody's crawlin'
Enter, enter
Thinking to myself, "This can't be real
This is how a giant, or a God must feel"

Enter fear
