

# Still Right Here

Tech N9ne

Hopefully, hopefully, I'm in your head  
I hope that you don't forget that I'm  
Still right here  
Still right here  
Still right here, here  
I'm still right here

In the flesh like ain't no death sight  
Looking forward to the next night, much longevity for Tech's life  
Like I'm searchin' for the neck bites, how many people will stress?  
I'm one of the best mics, multimilli's you guessed right  
One of the pioneers, I am here, never looking at no dying years  
Rhyming I'm in shining clear, when I get to going, they crying tears  
Of happiness loving rapitty-rappy shit  
That be smacking these tacky kids, blasting trash and be that remissed  
When it comes to living legends, giving dead ends to forbidden revving  
Of a spitting peasants that wanna fit in begging  
But inadequate rappers'll never sit in heaven  
For the long haul, song fall  
Everybody gone y'all, wrong call  
He was in his own, all blown, dawg  
(The industry) Dong sauce, grown drawers (Got in, hopefully)  
They got they money where it supposed to be  
Sitting hella heavy if he didn't spend it totally  
I can do whatever when I get up on the pen and pad  
I meant it when I said I was a pro to be, bliss soulfully  
Hella percussion I give when I'm bussin' and really that's slow to me  
Slow it down, I throw this flow around  
Then the women get freaky like the beasties they wanna hold it now  
Hit it 'cause my roguish style  
And when I get into ya, ugly was meant for ya  
Flippin' like gift for ya, Tech is the emperor, I be the coldest pal  
Still in the conversation, and my bombs are shaking  
On your station, I would racing and I didn't ponder waiting  
To get up in this being a fixture, that everybody will lift up  
And nobody will diss ya, and get away with it  
They getting victory is for fathom  
We don't play wit' it, spray quidick  
History the dark has 'em  
I done been around for the risen fall of a lot of y'all heart spasms and sti  
ll standing  
So when I say hopefully and hope when I know it's lightweight sarcasm

Hopefully, hopefully, I'm in your head  
I hope that you don't forget that I'm  
Still right here  
Still right here  
Still right here, here  
I'm still right here

They tried to block my Shyne here  
"Godfather Buried Alive" here  
I had an indeterminate sentence, never-  
ending, I was meant to live the "Life of Pi" here  
Heard a man cryin' about the five years he had to do and I was traumatized h  
ere  
Never goin' home, lost and all alone, wondering how to survive here

Release date felt like a light year  
Released hate 'cause I had to fight here  
But these days, feeling hella bright here  
I walk in a room, it's hella light here  
No e-scape  
I had to thrive here  
Become the rose that grew from the concrete  
Trapped in a cage  
Fasted and prayed til the day my blessing grew upon me  
Feeling melancholy  
I ain't talkin' crip when I say I had the blues upon me  
I was the man with contraband, smokin' sticks, medicated movin' like a Zombi e  
My biggest fear was still being here on the day that they buried mommy  
Now it's Strange how I'm home on a song with Tech N9ne spittin' like a Tommy Gun  
No Rocky V  
The underdog shall win, who's gonna stop me? None  
Hockey ties  
Shootouts and sudden death, you niggas should pro'ly run  
I've be-gun  
Spittin' like I've been possessed  
I'm gonna need an exorcism, projecting venom  
The only outcome I ever knew was either death or prison  
Unexpected to live beyond 25, but I rejected the vision  
Invested in living a better life for the days that I slept in prison  
Accepting wisdom from those who wanna see me win when I step in the building  
With no exceptions, I'm chillin', my only concern is collecting millions  
Ducking rodents and reptilian henchmen  
Fuck opponents and niggas that's squealin'  
Dark Man X-Raided  
The anti-hero - and a penitent villain  
Doper than DMT, out here raising hell like DMC  
You're finally famous 'cause TMZ resuscitated your career like EMTs  
Hardest nigga from my city for years  
Nobody fuckin' with me - none of my peers  
Benefited from my blood, off of my sweat, off of my tears  
Had to get Bizzy, it was Krayzie  
Had to Wish for this I couldn't be Layzie  
Had to Thug it out but my mind, spirit and Flesh-N-  
Bone been in Harmony lately

Hopefully, hopefully, I'm in your head  
I hope that you don't forget that I'm  
Still right here  
Still right here  
Still right here, here  
I'm still right here

You just live here, I've been here  
Standing strong like Taj Mahal  
War trophies in Senegal  
Pyramids in Machu Picchu and Gaza  
I'm the voice, and ahead of the father  
Melanin elevated, Kansas City marinated  
Got on the grill, half baked and Sunkist  
So yeah, I carry that heat  
That everlasting flame  
Check the temperature, when they say my name  
At home and overseas  
You wanna get known so bad that you Alicia Keys  
But I'm still right here  
Forever like hieroglyphics on limestones and bedrock

My lyrics scripture, not a TED talk  
It's me, you walked on water and land mines  
Blew up, I never blown away  
I got now, later, and forever  
But some of y'all be gone today  
But I'm still here

Hopefully, hopefully, I'm in your head  
I hope that you don't forget that I'm  
Still right here
