

# We Are Free

Tech N9ne

They way that we drummin' make you think what's one hunt  
Plummet we don't want it son its the dumbest  
We done and wanna get from it  
Havin' visions of eden, while this evil is breathin' inside a demon  
Deceivin' with light I'm even this season  
Companies kill my culture, sucka said on the sofa  
See the soul of a soldier, I'mma go to Zack De la Rocha  
And awaken rebel sound that'll break a fat label down  
Gotta vacate this able now, everyday fate from a halo crown  
If they oppose it, give 'em hell is the key  
Well is the free, we ain't practicin' celibacy  
A relic you think we anghellic, tell it to me  
We'll mail and sell it to fellowships and telekinesis  
When occur the people movin' develop diseases  
Sick on your symphony some get hella facetious  
When searin' your shows I'm somberin' the shell it decreases  
Light for the lord of love a lot leveled is leaf lit  
Free (styles), free (life), free (reign)  
We (wild), we (fight) for these (brains)  
Be (gone), she likes the eased (pain)  
He's (mild), he gripes cause she's (Strange)  
Take off your shackles people come along  
Fuck a fraggle nigga become a con  
We keep it coated then when summer gone  
Cowardly critters not with the strong better run along

We are free, we are  
We are free, we are  
We are, we are free  
We are, we are free

No time for killin' time, because it's killin' time  
I'm an American hustler sedated in my prime  
Pray for the 99, ride with the 88  
Spinal 1 percent it's just a numbers game  
Fame for us psychos, Jackson's to Michael  
Missiles for silos, no stones for the high road  
Army of 5-0s, for half foes I hydro  
Drones over my home, no phone tap to spy on  
And though they say there's nothin' to fear but fear itself  
I keep a bottle of spirits near my bookshelf  
Because a runaway slave will never sleep well  
I self medicate the frame in my brain cell  
Married to the matrix, that bitch got two faces  
She gave me all I got and took away all my acquaintance  
Travellin' the planet walkin' on so many stages  
Made me realize dimensions gettin' jumped through one a daily  
He's an alien, Eddie Arkadian  
In love with money and fame there ain't no savin' him  
But I'm the fuckin' last dragon spittin' radiance  
Walkin' a planet I created in my cranium
