

In The Future

Teddy Hyde

I've been living in the future
And everything I wanted I have
I have

I've been living in the future
And everything I wanted I have
I have

I've been living in the future
As a way from stopping living the past
The past

I've been living in the future
And everyone around me is here

I've been living in the future
But my greatest fear is still that I have
I have

I've been living in the future
And everywhere I'm going I am

I've been living in the future
And every piece of dirt is a path

I've been living in the future
I've been living in the future
