

## A Little More Magic

Teddy Pendergrass

I believe the time is sort to come  
When we all could live together  
And share this world as one  
There's no better love than what we feel  
No roads left untravelled  
Only wind behind our sails

So let's erase the pain inside our hearts forever  
There's just one thing to say  
What need today

Is a little more magic  
Just one more miracle  
To help us find a way  
To end the sorrow of today  
A little more magic  
Just one more miracle  
To help us find a way  
To give love a place to stay

There's no easy way to win this war, oh no  
We don't know who we fighting  
Only what we're fighting for  
I believe the power lies within us, oh yeah  
Someone has the answer  
From the message that He sends

So let's erase build a tower to sky of glory  
And we could find a better way to live  
Give all our love  
'Cause all we need today

Is a little more magic  
Just one more miracle  
To help us find a way  
To end the sorrow of today  
A little more magic  
Just one more miracle  
To help us find a way  
To give love a place to stay

Stars and the rainbows  
Moon and the sun that glows  
A little more stardust  
All we need, all we need  
All we really, really need  
Is a little more

Is a little more magic  
Just one more miracle  
To help us find a way  
To end the sorrow of today  
A little more magic  
To give love a place to stay
