

Do What?

Teenage Bottlerocket

I'm surprised you showed up
The last time you were here you said to grow up
To me and all my friends we started to crack up
You could have told us how it was
But we couldn't shut up
So you went crying out the door

I never really thought about what to tell you
I bet you got a couple things you'd like to say

So do what? Do what you want to do
Be anything you want to be
But don't expect to be with me
Do what? Do what you want to do
There's plenty people out there too
They might just want to be with you

Do what the other people tell you
Do what the other fuckers say

You always look down to everyone around
You're dragging us all down
The stereo was too loud
So you had it turned down
You said you always get your way
When you put your foot down
Until you fell flat on your face

I never really thought about what to tell you
I bet you got a couple things you'd like to say

So do what? Do what you want to do
Be anything you want to be
But don't expect to be with me
Do what? Do what you want to do
There's plenty people out there too
They might just want to be with you tonight

Yeah they might just want to be with you tonight
Yeah they might just want to be with you tonight
Yeah they might just want to be with you tonight
Yeah they might just want to be with you tonight
