

With You

Teenage Fanclub

I will walk with you through darkness
And see what we can see
I will hide with you from sadness
And bad philosophy
I will laugh with you at madness
And learn stupidity

The world is wrong, the world is right
And you are right and you are wrong
And life is short and life is long
With you I'll see it

Who knows what we will see
Who know what we might find
Step over the fallen tree
And beware the fallen mind

The world is wrong, the world is right
And you are right and you are wrong
And life is short and life is long
With you I'll see it

The world is wrong, the world is right
And you are right and you are wrong
And life is short and life is long
With you I'll see it
