

Smile for me as you're tied to the bed
Never could sleep without the ring in my head

When I'm stuck down there, you wanna know
If I am numb, but you don't care
We're all stuck down, and you wanna know if we're alive

A humbug in heat
In shadows you please
Impersonate me
You are the disease

In bed, with the chemicals staining the skin
And your memories fading away

When I'm stuck down there, you wanna know
If I am numb, but you don't care
We're all stuck down, and you wanna know if we're alive, we're
alive

We'll please you
And leave you feeling low
We'll feed you
Enough to keep you slow

When I'm stuck down there, you wanna know
If I am numb, but you don't care
We're all stuck down, and you wanna know if we're alive, we're
alive
